

**AMENDMENTS TO THE CLAIMS, COMPLETE LISTING OF CLAIMS**  
**IN ASCENDING ORDER WITH STATUS INDICATOR**

Please amend the following claims as indicated.

1. (Currently Amended) A method for joining a ~~joined material~~ glass having a hydroxyl group containing surface to a joining material having an ~~organosiloxay~~ organosiloxyl group containing surface, wherein the ~~organosiloxay~~ organosiloxyl group containing surface is irradiated by ultraviolet radiation having wavelength of less than 220 nm thereby carrying out an oxidation treatment, and the hydroxyl group containing surface of the glass is adhered to the oxidized ~~organosiloxay~~ organosiloxyl group containing surface.

2. (Canceled)

3. (Currently Amended) The method according to claim 1, wherein the ~~organosiloxay~~ organosiloxyl group containing surface is formed by a surface altering treatment using hexamethyldisilazane.
